Management Discussions & Analysis Report

Indian Pharma Industry Scenario

The Indian pharmaceuticals market (IPM) has seen double-digit growth in the last one year. The Indian

Pharmaceuticals market is forecasted to grow at a compound annual growth rate (CAGR) of 118% (+-3%), between 2015 to 2020, reaching Rs. 1859.5 billion by 2020

In India, Gross Domestic Product (GDP) grew by 7.1% in the Fiscal Year 2016-17, which makes India the fastest growing G20 economy. The acceleration of structural reforms, the move towards a rule-based policy framework and low commodity prices have provided a strenthened growth impetus. Recent deregulation measures and effrots to improve the ease of doing business have boosted foreign investment. In April 2017, the world economic outlook (WEO) report by the International Monetary Fund, estimated that domestic demand and a growth in exports will remain key drivers towards GDP growth. Mediumterm growth prospects remain favourable according to the WEO report, with growth forecast to rise 8% due to the implementation of key reform, loosening of supplyside bottlenecks and appropriate fiscal and monetary policies. In addition, the country's most significant tax reform in decades, the Goods & Services Tax (GST), was approved in Parliament with an expectation for implementation during the latter half of 2017.

In the Union Budget 2017, the government has demonstrated its commitment to increase healthcare spending. The National Health Plan has been approved by the cabinet and aims at a holistic approach to address the healthcare problems of all sectors of society and their solutions with participation from the private sector as strategic partners in the mission. It envisages private sector collaboration for strategic purchasing, capacity building, skill development programmes, awareness generation, developing sustainable networks for the community to strengthen mental health services and disaster management. The policy also advocates financial and non-financial incentives for encouraging private sector participation. Your company welcomes these measures to serve more patients of our country.

Presently the market size of the pharmaceutical industry in India stands at US\$ 20 billion. Indian pharmaceutical manufacturing facilities registered with the US Food and Drug Administration (FDA) at 523, highest for any country outside the US.

Domestic pharmaceutical market grew at a CAGR of 12 per cent year-on-year in February 2016, broadly in line with the average of 12.9 percent since April 2015. Indian pharmaceutical firms are eyeing acquisition opportunities in Japan's growing generic market as the Japanese government aims to increase the penetration of generic drugs to 60 percent of the market by 2018 from 30 per cent in 2014, due to ageing population and rising health costs.

Significant Accounting Policies

A. Basis of Preparation of Financial Statements

The financial statements are prepared under the historical cost convention, except for certain fixed assets which are revalued, in accordance with the generally accepted accounting principles in India and the provisions of the Companies Act, 2013.

B. Use of Estimates

The preparation of financial statements requires estimates and assumptions to be made that affect the reported amount of assets and liabilities on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Difference between the actual results and estimates are recognised in the period in which the results are known/ materialised.

C. Fixed Assets

Fixed Assets are stated at cost net of recoverable taxes and includes amounts added on revaluation, less accumulated depreciation and impairment loss, if any. All costs, including financing costs till commencement of commercial production, net charges on foreign exchange contracts and adjustments arising from exchange rate variations attributable to the fixed assets are capitalised.

D. Intangible Assets

Intangible Assets are stated at cost of acquisition.

E. Depreciation and Amortisation

Depreciation on fixed assets is provided as per Schedule II of the Companies Act, 2013. Leasehold land is not amortised.

F. Impairment of Assets

An asset is treated as impaired when the carrying cost of asset exceeds its recoverable value. An impairment loss is charged to the Profit and Loss Account in the year in which an asset is identified as impaired. The impairment loss recognised in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

G. Foreign Currency Transactions

- (a) Transactions denominated in foreign currencies are recorded at the exchange rate prevailing on the date of the transaction or that approximates the actual rate at the date of the transaction.
- (b) Monetary items denominated in foreign currencies at the year end are restated at year end rates. In case of items which are covered by forward exchange contracts, the difference between the year end rate and rate on the date of the contract is recognised as exchange difference and the premium paid on forward contracts is recognised over the life of the contract.
- (c) Any income or expense on account of exchange difference either on settlement or on translation is recognised in the Profit and Loss account except in case of long term liabilities, where they relate to acquisition of fixed assets, in which case they are adjusted to the carrying cost of such assets.

H. Investments

Long Term Investments are stated at cost. Provision for diminution in the value of long-term investments is made only if such a decline is other than temporary.

I. Inventories

Items of inventories are measured at lower of cost and net realisable value after providing for obsolescence, if any. Cost of inventories comprises of cost of purchase, cost of conversion and other costs including manufacturing overheads incurred in bringing them to their respective present location and condition. Cost of raw materials, process chemicals, packing materials, trading and other products are determined on weighted average basis.

J. Revenue Recognition

Revenue is recognized only when it can be reliably measured and it is reasonable to expect ultimate collection. Revenue from operations includes sale of goods, excise duty, adjusted for discounts (net), goods returned and breakages and expiry. Dividend income is recognized when received. Interest income is recognized on time proportion basis taking into account the amount outstanding and rate applicable.

K. Excise Duty

Excise duty is accounted on the basis of both, payments made in respect of goods cleared as also provision made for goods lying in bonded warehouses.

L. Employee Benefits

- (i) Short-term employee benefits are recognised as an expense at the undiscounted amount in the profit and loss account of the year in which the related service is rendered.
- (ii) Post employment and other long term employee benefits are recognised as an expense in the Profit and Loss account for the year in which the employee has rendered services. The expense is recognised at the present value of the amounts payable determined using actuarial valuation techniques. Actuarial gains and losses in respect of post employment and other long term benefits are charged to the Profit and Loss account.

M. Borrowing Costs

Borrowing costs that are attributable to the acquisition or construction of qualifying assets are capitalised as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use. All other borrowing costs are charged to Profit and Loss account.

N. Provision for Current and Deferred Tax

Provision for current tax is made after taking into consideration benefits admissible under the provisions of the Income-tax Act, 1961. Deferred tax resulting from timing difference between taxable and accounting income is accounted for using the tax rates and laws that are enacted or substantively enacted as on the balance sheet date.

O. Provisions, Contingent Liabilities and Contingent Assets

Provisions involving substantial degree of estimation in measurement are recognized when there is a present obligation as a result of past events and it is probable that there will be an outflow of resources. Contingent Liabilities are not recognised but are disclosed in the notes. Contingent Assets are neither recognized nor disclosed in the financial statements.
